## GLOBAL CRYPTO WOMEN CIRCLES & INVESTMENT CLUB PROPOSAL

### **Abstract**

WomenInCrypto.Net is a proposed global social & professional referral network; online business incubator; & digital marketplace based on local groups of crypto investment clubs empowered by a global network of women and nonprofit using our fungible token.

The crypto-investment club's main goal is to introduce and utilize cryptocurrency and the economy that is being developed around a crypto based tokenized market. The club is set to create an accessible and supportive environment for newcomers to engage, learn, make mistakes. and grow. We believe that the crypto trend is going to become central in the economy in years to come and will benefit those who took the effort participating and developing products in its early stages. The club aims to make crypto trading accessible to women and nonprofits whom are usually left out of such activity.

Furthermore, we believe that by expanding the circles of knowledge through personal and social engagement we can fast forward that adaption and make our members a leading force of market makers that will shift profit making from resource depletion to community rejuvenation and social impact.

## Vision & Strategy

### **Motivation**

Bitcoin, Blockchain, Cryptocurrencies and ICO have been the trendiest names in investments in the past year, yet many have a hard time to grasp what is that technology-based money means and more so how one deal with it having no banks or brokers to mitigate and secure all interactions and transaction. This set a very high bar even for very sophisticated investors with an articulate tech background. There are also very few organized ways to go about learning this filed that move and changes so rapidly. It requires a leap of faith and courage to jump into these rapid waters.

WomenInCrypto.net club, and resulting WIN Coin, is a platform concept to raise participants level of investing participation from entry level to intermediate via mentorship, co-learning and co-investing.

### **Overview**

Our aim in this is to lead a trend based on knowledgeable assessment rather than be led by what the market is doing. We want to become a positive force for projects that are made to create a better economy, not those that are made only to create fast profit. The goal of the club is to increase the level of exposure and knowledge to what is offered out there and make the investors understand what is it in which they are investing. Of course, each participant is a free individual and can decide for themselves what, which and how to invest.

### **Scope**

1. Setting up chapters and growth pattern
2. Trainings on How To Set up wallets and exchange accounts
3. Experiment with transactions exchanges and trading
4. Research & Review existing currencies in the market
5. Research & Review upcoming ICOs and white papers
6. Global Market maker platform based upon resulting trends & knowledge based transparent decision process
7. Tokenization based entrepreneurship program

8. Token based Marketplace
9. Crypto Educational and reference library
10. FOMO Fear of Missing Out
11. FUD Fear, Uncertainty and Doubt

### **WomenInCrypto.Net Club Structure**

We would organize as small circles of approx. 10 women in global local-based seed communities which can meet and interact in local meetup-style formats, group gatherings and conferences. Each seed community will interact with a sister global community and in most cases, at least one local nonprofit, to create a global alliance group. These alliances will form the governance of the club in terms of market making goals and in terms of voting power. Once a member is registered and assigned to a circle she or he will require to pay a small member fee and the first sum to buy into the development of our own WIN coin. But on a day to day basis, the purpose of the Club is to learn more about coins and investing in general, and Club Members shall be free to use all information learned about all other coins and blockchain projects via the club to decide for themselves which coins they would like to purchase or trade, at their own discretion.

### **Rules and Governance Structure**

Members have voting rights attached to a reputation score they build. Members acquire reputation based on their seniority responsibilities and the volume of their financial activity.

On some of the issues that are more of organizational nature seniority will serve as the main measures while on investment related issues, the holdings of base token/s of each member will have more weight.

### **How to join**

To become a club member you will need first to fill out a contact form with your name, some basic information, and your location details, so you can be assigned a direct connection to join an existing circle or create a new circle if that is what you would like to do or if there is none available in your region. A club representative will then get back to you.

### **Examples of the Eventual Goal of Expanding the Circle of Women Education & Investing**

Our goal is to create our own WIN Coin through which our members can use and learn globally as a group to pay dues and buy and sell each other's products and services. In addition, we would like to use WIN Coin to create a Club Member VC Fund as well as a nonprofit Endowment, Women.Fund.

To this end, member dues are used to support the creation of such funds that not only allow the investors themselves to invest but create matching funds that are used to educate nonprofits and women that do not have the ability or funds to invest until they can start earning our WIN Coins.

This concept will evolve over time, and dues should be treated as education with added potential of ownership of a number of predetermined WIN coins, should the development outcome occur.

## **Investment Club Research of Tokens & Coins - Vital coin paradigm**

The vital coin paradigm refers to the potential of a currency to sustain life and the distribution architecture which enable that potential to materialize in a sustainable and empowering ecosystem.

Many of the new coins are not well designed to achieve that goal, and those who are successful in that are the ones to benefit users and thus should be promoted to become the market makers.

At this first stage we are researching existing coins. We think that many of these tokens or currencies can be made much more beneficial, and that we as users can benefit directly from the efforts already put into developing and marketing these coins. This also includes accessible wallets, websites, tutorials mining and support.

## **What we do in Club Meetings**

Member shall be given tools and training to help them setup wallets and accounts on trading platforms. In Club meetings we will review ICO whitepapers and proposal to assess their true value for us as investors and each member shall have the opportunity to create recommendations based on their investigations. Each member then has the option to use this information in their investment decisions, or to decide for themselves which, if any, investments they make monthly.

The ideal club structure will be 10 participants. One or more members of the club shall keep a google sheet spreadsheet updated so that members can vote on which coins they would like to invest. This exercise will be phantom, in that there will not be real investments on the club level but will represent what club participants may be doing in their own private investing.

This exercise will give a tool through which participants can monitor the results of their proposed club investments. Once a member of a club has enough people, they can form their own club and mentor a new group of people to “give back” and pass on what they have learned.

This member would also remain in one or more clubs (circles, groups, chapters, whatever terminology we decide upon). This way, the groups are connected, and information is shared.

## **15 Targeted Geographical Areas for Initial Sister Circles:**

London  
Japan  
China  
Israel  
Dubai  
Brazil  
USA  
Canada  
Singapore  
India  
Russia  
Netherland- Holland

Germany  
Croatia  
South Africa

### **Implementation Time Line**

Efforts for this endeavor started in April 2018

### **Launch**

Official Launch date shall be targeted around a significant date in the future.

### **Member Dues**

Monthly Membership dues are approx. \$20, a portion of which shall go to the administration of the Club, the support of the umbrella 501(c)(3), educational materials, marketing, and any other valid expenses, such as legal or accounting. The remainder of said dues shall be used to purchase WIN Coins for training and educational purposes, as well as to support each other via the use of WIN Coins to purchase products and services from each other.

### **Logistics, Communications and Events:**

Website: <http://www.WomenInCryptoGlobal.com>

Official Meetup: <http://www.WomenInCrypto.Net>

Facebook: <http://www.facebook.com/WomenInCrypto>

LinkedIn: <http://www.WomenInvestment.Club>

Social Media: <http://www.CoffeeTalk.co> “Let’s Talk Crypto!”

### **Next Steps:**

Legal Formalizing Club under the Umbrella of an existing 501(c)(3)

Creation of a Discord or other form of online chat

Creation of online forms, educational materials, brochures, etc.

Creation of a profession “club” website that automates the membership process
