Let's Start

Each WEDNESDAY we focus on WINning at the game of "phantom" investing in fun and interactive ways to learn and support each other in educating, using, trading and investing in CRYPTO, starting with a \$100k "phantom" portfolio..

1. If you do not already have a wallet, at least setup a Coinbase wallet by next week. If you do this at <http://www.Flow.Guru> we will each get \$10 of BTC if you invest \$100.
2. Invite others to join your group so that you will have others working with you on #3.
3. For example, the first week's research coins are: Monero, Theta; Cardano; Verge; Zap; and Stellar.

Each global circle (or what we call MasterNodes) researches the above coins. Research and phantom invest the above six coins. Next Wed., one member of your circle is to make a [google sheets doc](#). on your respective channels depicting the percentage of \$100,000 phantom investment that your Circle (or MasterNode) chooses to invest in each of those coins, based upon your collective research and agreement from your group.

When we have enough Global Circles, we can have a friendly competition and WIN tokens for our portfolio's performance.
